The Information Processing Management Association presents:

forum 2001

"Seamless Services: Anytime, Anywhere"

May 22nd & 23rd, 2001 St. Martin's College
5300 Pacific Ave. SE, Lacey, Washington*

You are invited to attend Forum 2001. This year's forum is designed to provide the tools needed to meet the challenges confronting state technology leaders as they try to implement today's digital government.

If you've ever wished that you had a single, time-effective way to get access to the latest ideas, trends, and solutions in one location then Forum 2001 is your answer.

FORUM 2001 is a chance to see the latest technologies and to share experiences; to talk to the vendors who market and support these new technologies; to attend presentations by noted speakers who can explain trends and describe real world solutions. Forum 2001 is an excellent chance to talk to technology managers and technology implementers who are experiencing, or have solved, similar problems to what you're facing today.

For more information, go to IPMA's Website:
<http://www.ipma-wa.com>
